Oncology Fundamentals for Advanced Practice Providers

Created in collaboration with APSHO

Program Goals

- The objective of this module is to provide advanced practice providers (APPs) who are new to oncology with an evidence-based overview of the key areas of focus when caring for patients with cancer.
- At the completion of the module, the learner should be able to:
 - Identify fundamentals of the general cancer disease state, diagnostics, staging, and common treatment modalities.
 - Describe the key principles to adverse event (AE) management and what resources are available to support clinical decision-making.
 - Understand the importance of prompt recognition and treatment of oncologic emergencies.
 - Explain key principles of supportive and palliative care and available resources to support clinical decision-making.
 - Discuss the purpose of surveillance and survivorship care.
